From commercial buildings to industrial facilities, Sherwin-Williams has the most comprehensive line of high performance coatings. Our commitment to product innovation and understanding your needs has led to the introduction of Pro Industrial High Performance Coatings.

With our new line of Pro Industrial products, we have high performance coating solutions for Healthcare, Hospitality, Educational, Commercial and Industrial facilities.

The Pro Industrial products include a variety of primers and topcoats including waterborne acrylics, alkyds and high performance epoxies. These new-technology products are low-VOC, easy to apply and offer the durability you need.

No matter what your coatings needs may be, our expertly trained representatives are always available to help you find the best coating solution for your unique situation. And with 3400 servicing locations throughout North America, you can be assured you will get your products when you need them.
Pro Industrial is a complete line of high performance coatings.

Pro-Cryl Universal Acrylic Primer

An alternative to conventional solvent-based primers.
Pro-Cryl is a high performance waterborne acrylic primer that accepts all topcoats, including hot-solvent urethanes and epoxies. Formulated with proprietary technology, this coating is recommended for use whenever a corrosion-resistant primer is required. Also suitable as a barrier coating, Pro-Cryl is designed for use on multiple substrates such as iron, steel, galvanized and aluminum. Available in red-oxide, gray and off-white.

0 VOC Acrylic

High performance acrylic with zero-VOC.
0 VOC Acrylic is a high performance acrylic coating with low odor and zero-VOCs. This coating is perfect for applications that require a durable acrylic finish. This single component product meets all environmental standards. Available in a gloss or semi-gloss finish.

Industrial Enamel 100

Low-VOC, general purpose enamel.
This interior/exterior all-purpose enamel is low in VOCs (<100g/L) and great for handrails, machinery, safety and Pipe Marking and most commercial applications.

Multi-Surface Acrylic

Multi-purpose high-hiding acrylic.
Multi-Surface Acrylic is a low-VOC, high performance coating that can be used on a variety of substrates. It requires minimal surface prep and is high-hiding. It can be applied to walls and ceilings, and has dryfall characteristics.

High Performance Epoxy

An excellent coating for commercial environments.
High Performance Epoxy is a high-gloss, low-VOC, 80% volume solids, two-package epoxy polyamide for use in industrial and high performance commercial applications. It offers excellent chemical and abrasion resistance. It can be used on walls, floors or equipment.

Hi-Bild Waterbased Catalyzed Epoxy

The perfect coating for high-traffic areas.
If you’re looking for a general purpose epoxy with excellent performance and durability, then you need Sherwin-Williams Pro Industrial Hi-Bild Waterbased Catalyzed Epoxy. It’s tough enough for use on a variety of high-traffic interior and exterior surfaces and versatile enough to be applied on primed steel masonry, concrete, plaster drywall and wood. What’s more, this two-component waterbased acrylic epoxy will save you time and labor with fewer recoats, easier maintenance and the ability to apply 6 mils dry in one coat.

Precatalyzed Waterbased Epoxy

One-part epoxy with the durability of a two-part.
When the job calls for durability and washability, but your budget calls for speed and productivity, you’ll find the answer with Sherwin-Williams Pro Industrial Precatalyzed Waterbased Epoxy. This single-component, commercial grade, waterbased epoxy rivals virtually any two-component waterborne system. Pro Industrial Precatalyzed Waterbased Epoxy truly delivers a tough, long-lasting epoxy finish with the smooth look of traditional latex.

High Performance Aerosols

Full line of industrial aerosols.
The Pro Industrial line of aerosols consists of rust preventative spray paint, primers, electronic cleaners and welders anti-spatter.
